1 Introduction

1.1 Purpose and Scope of the BSC Procedure

This BSCP defines the key interfaces, the timetable and the responsibilities of the Applicant Party, the BSCCo, the Panel and [Housekeeping]the CodeBSC Agents when associating more than one BM Unit with a Trading Unit. It does not cover the provisions of the Code relating to BM Unit registration.

This BSCP is designed to ensure orderly and efficient implementation of the Code provisions relating to BM Units being associated with the same Trading Unit. Every BM Unit is inherently a Sole Trading Unit and in isolation requires no further authorisation. This BSCP covers the process by which Applicant Parties demonstrate conformance with the criteria for qualification for more than one BM Unit being associated with a single Trading Unit.

This BSCP also describes the automatic Trading Unit allocation for Exempt Export BM Units, and how the Lead Party for an Exempt Export BM Unit can change this allocation.

1.2 Main Users of the BSC Procedure and their Responsibilities

This BSCP should be used by:

- (a) Applicant Party
- (b) BSCCo
- (c) The Panel
- (d) Transmission Company (TC)
- (e) Licensed Distribution System Operator (LDSO)
- (f) Central Registration Agent (CRA)
- (f)(g) Lead Party seeking to change an Exempt Export BM Unit's Trading Unit allocation

who are responsible for, or contribute to, the registration of a Trading Unit within the Central Registration System (CRS).

1.3 Key Milestones

The key milestone in this BSCP is the 30 Working Days notice required for the application.

1.4 Balancing and Settlement Code Provision

This BSCP should be read in conjunction with the Code and in particular Section K.

This BSCP has been produced in accordance with the provisions of the Code.

In the event of any inconsistency between the provisions of this BSCP and the Code, the provisions of the Code shall prevail.

1.5 Associated BSC Procedures

In using this BSCP, applicants should take note of the requirements of other BSCPs, as applicable.

BSCP15	BM Unit Registration
BSCP20	Registration of Metering System for Central Volume Allocation
BSCP38	Authorisations [Housekeeping]—(or where appropriate BDTP38). Please note references throughout this document to BSCP38 also relate to the associated BDTP38 where appropriate

1.6 Trading Unit Approval (including rules for Exempt Export BM Units)

Section K of the Code defines the rules under which Trading Units are approved and registered with the CRA. The Panel utilises these rules to confirm acceptance of a Trading Unit application.

~~With the exception of Base Trading Units, the configuration of~~ Where a registered and effective Trading Unit is registered with the CRA and is effective, the configuration of that Trading Unit may not change unless another application detailing the proposed changes has been made and approved. In the case of those Trading Units consisting only of Exempt Export BM Units in the same GSP Group (the Class 4 Trading Units), the Panel has delegated approval to BSCCo ~~is on the basis of the BM Units' location in relation to a GSP Group rather than their configuration.~~

All Supplier Base and Additional (non Exempt Export) BM Units will automatically belong to the Base Trading Unit for the relevant GSP Group, and may not belong to any other Trading Unit.

An Exempt Export BM Units which is Embedded in a Distribution System will automatically belong ~~can elect to belong~~ to the Base Trading Unit for the relevant GSP Group, but can ~~also~~ elect to belong to a Sole Trading Unit or apply to be part of a Class 4 Trading Units or other Trading Unit in accordance with this BSCP. Elections by Embedded Exempt Export BM Units to change their allocation from a Base Trading Unit to a Sole Trading Unit (or vice versa) do not require Panel approval. Applications by Embedded Exempt Export BM Units to form a new Class 4 Trading Unit or other Trading Unit require approval by BSCCo or the Panel respectively, and must follow this BSCP to ensure that the necessary criteria are met. Applications by Embedded Exempt Export BM Units to join or leave an existing Class 4 Trading Unit or other Trading Unit require the Trading Unit to be de-registered/re-registered as appropriate in accordance with this BSCP.

An Exempt Export BM Unit which is Directly Connected to the Transmission System will automatically be a Sole Trading Unit and may not form part of a Class 4 Trading Unit. It may apply to be part of another Trading Unit in accordance with this BSCP.

~~When in a Trading Unit with other Lead Parties, please note that changes to GC and DC values for other BM Units within the Trading Unit can affect the overall P/C status of the Trading Unit and thus the BM units within it, with the exception of Exempt Export BM units that have had the P/C flag explicitly set.~~

~~Other types of~~A BM Unit may ~~leave~~~~be removed from~~ a Trading Unit and become a Sole Trading Unit on application in accordance with this BSCP~~and on giving the required notice, with the exception of (non Exempt Export) Supplier BM Units which must always belong to the Base Trading Unit.~~

A Trading Unit application will not be valid if any BM Unit which constitutes the proposed Trading Unit ~~already~~~~also~~ belongs to any other Trading Unit other than a Sole Trading Unit (or a Base Trading Unit in the case of Embedded Exempt Export BM Units).

1.7 No longer used~~Registration of an Exempt Export BM Unit in a Trading Unit~~

~~A Lead Party for an Exempt Export BM Unit is required to meet different registration requirements to those of other BM Units when registering an Exempt Export BM Unit within a Trading Unit.~~

~~An Exempt Export BM Unit will be automatically allocated to the Base Trading Unit of the relevant GSP Group, and such allocation will not require Panel approval. The Lead Party for an Exempt Export BM Unit can apply to rejoin the Base Trading Unit (only) on leaving a Sole or other approved Trading Unit, and this will not require Panel approval.~~

~~A Lead Party for an Exempt Export BM Unit may apply to leave the Base Trading Unit and be registered with a new approved Trading Unit or Sole Trading Unit. This registration of an approved or Sole Trading Unit will not require Panel approval.~~

1.8 Impact of a BM Unit's Trading Unit Registration on its P/C Status

When in a Trading Unit with other Lead Parties, please note that changes to Generation Capacity (GC) and Demand Capacity (DC) values for other BM Units within the Trading Unit can affect the overall P/C Status of the Trading Unit and thus the BM Units within it.

Exempt Export BM Units which have explicitly set their P/C Flag to Production or Consumption in accordance with Section K3.5 and BSCP15 are an exception, as their P/C Status will be fixed by their P/C Flag independently of their Trading Unit.

4 Appendices

4.1 Trading Unit Registration Information Requirements

Applicant Party shall send a written application to the BSCCo.

~~Trading Units other than Class 4 Trading Units~~
~~BM Units other than Exempt Export BM Units or Supplier BM Units~~

(a) Information Required

- Name and address of Applicant.
- Confirmation from all the Authorised Signatories of the relevant Lead Parties of their agreement to be associated with a single Trading Unit.
- Full description of the nominated BM Units.
- Full description of the Metering Systems located or to be located at the nominated BM Unit(s) and their location.
- Full description of the points at which all relevant electricity flows will be measured.
- Such other information as the applicants shall consider relevant to their application.
- Basis for the application.
- Additional information may be provided for consideration by the BSCCo.
- Evidence which demonstrates sufficient similarities with sites which would satisfy the conditions applicable to Class 1, Class 2, Class 3, Class 5 or Class 6 Trading Units, such that it would be unreasonable not to treat the nominated BM Unit(s) as a Trading Unit.

(b) Documentation Required

- Line Diagrams showing electrical connections at the Nominated BM Unit(s).
- Line Diagrams showing location of Metering Systems and measurement points.
- Schedule of Dedicated Assets and or Contiguous Assets and evidence to support this schedule and classification such as Connection Agreement documentation (this will not be required for Class 1 or Class 5A Trading Units).
- Evidence that assets and equipment electrically connecting the generation and demand are capable of supporting the quantity of electricity to be delivered and accepted at the nominated BM Unit(s).

- Confirmation from the Transmission Company that the metering arrangements are compatible.
- BSCP31/4.3 Registration of Trading Unit Application Form.
- BSCP31/4.5 Registration of Trading Unit Details Form.

Exempt Export BM Units Class 4 Trading Units

(a) Information Required

- Name and Address of Exempt Export BM Units.
- GSP Group.
- Trading Unit name.
- Lead Parties.
- Effective From Date.

(b) Documentation Required

- List of BM Units to be associated with the Class 4 Trading Unit.
- Confirmation from the CRA that the Exempt Export BM Units to be associated with the Class 4 Trading Unit are Embedded and are located in the same GSP Group.
- Confirmation from the CRA that none of the BM Units to be associated with the
- Class 4 Trading Unit have been registered pursuant to section K-2.1.1 (d) of the BSC.
- List of BM Units in that Trading Unit.
- Letters from each Trading Unit Lead Parties confirming their agreement that the Exempt Export BM Units will belong to that Trading Unit.

⁸ This process shall not apply where a Trading Unit is being transferred from one Party to another as part of the CVA BM Unit CoBO process (providing no other changes are being made to the registration data associated with the BM Units). Please refer to the 'Change of CVA BM Unit Ownership' process in BSCP15 which defines the process for transferring the ownership of Trading Units in such circumstances.

Attachment BSCP31 / 4.6A, to Form BSCP31 / 4.6 ‘De-Register Trading Unit’

The following should be completed for each Exempt Export BM Unit comprising a Class 4 Trading Unit being de-registered under BSCP31, using Form BSCP31 / 4.6

Failure to complete this attachment, for any BM Unit in such Class 4 Trading Unit, is taken as authorisation to allocate that BM Unit to the Base Trading Unit for the relevant GSP Group on de-registration of the Class 4 Trading Unit.

The allocation set out below will be contiguous with the de-registration set out on the main form.
