Dear Alistair

ELEXON Response to Request for Information under BSC Section C3.6

Thank you for your letter of 5 October 2007 alerting me to the likelihood that in undertaking a further review of Oxera's independent cost benefit analysis (conducted as part of the industry assessment procedure for BSC modification proposals on zonal transmission losses) Ofgem, or its consultant, may require further information in relation to the Oxera analysis and that requests for that information will be formally channelled through ELEXON.

I can confirm that ELEXON is happy to comply with the provision of relevant information to the Authority in accordance with C3.6.1 of the BSC. We will also liaise with Oxera, as appropriate, in an endeavour to obtain the further relevant information requested by Ofgem.

I also note Ofgem's desire for ELEXON to be transparent about any request for information and can confirm that the obligations specified in BSC Section C3.6.5 will be adhered to. The request in your letter dated 5 October 2007 and any further request and associated response will be made available to BSC Parties through external ELEXON newsletters and/or published subsequently on the BSC website.

I trust this response provides assurance of ELEXON's co-operation, and I await any request for relevant information.

Yours sincerely

Stuart Senior
Chief Executive
