CPC00612: Impact Assessment of P211

Please provide responses to the following questions:

11 Would the Proposed Modification, as outlined in section 1 and 2 of the attached Requirement Specification for Modification Proposal P211, impact your organisation? **Yes / ~~No~~\***

12 If yes, please provide a description of the impact, any costs incurred, and the implementation timescales required.

**The Proposed Modification could affect several internal systems and considerably more time would be necessary to conduct a proper impact analysis. Based on initial analysis we estimate that it would take approximately 6 months to implement a change of this nature at a cost of between £50k and £100k.**

13 Would the potential Alternative Modification, as outlined in section 1 and 2 of the attached Alternative Requirement Specification for Modification Proposal P211, impact your organisation? **Yes / ~~No~~\***

14 If yes, please provide a description of the impact, any costs incurred, and the implementation timescales required.

**The Alternative Modification could affect several internal systems and considerably more time would be necessary to conduct a proper impact analysis. Based on initial analysis we estimate that it would take approximately 6 months to implement a change of this nature at a cost of between £50k and £100k.**

15 Any other comments:

**The alternative version (P211AS10) references the sub flow 2 of the I014 report. We believe this may be a mistake in the document. The statement in the Alternative version is as follows;**

**"Parties will be impacted by the change to sub-flow 1 of the Settlement Report (SAA-I014, sub flow 2)."**

**In the standard change doc, a similar statement exists;**

**"Parties will be impacted by the change to sub-flow 1 of the Settlement Report (SAA-I014)."**

**Please could this be clarified.**
