Question 1: Do you agree with the CP1502 proposed solution?

Summary

Yes	No	Neutral/No Comment	Other
6	0	0	00

Responses

Respondent	Response	Rationale
E.ON UK	Yes	There will be a very minimal impact in reference to changes to our internal processes and removal of the PC 5 to 8 data from the profiling sample.
British Gas	Yes	-
TMA Data Management Ltd	Yes	-
Npower	Yes	<p>It makes no sense to use industry resources to monitor NHH profiles that should no longer exist; therefore we fully support this change proposal.</p> <p>The only argument for keeping it is that there are still reasonable numbers of PC 5-8s that are still NHH, so this might be something Elexon would want to investigate further.</p>
SSE Energy Supply Ltd	Yes	We agree with the proposal to remove outdated references to profile classes 5-8 from BSCP510 and Service Description for Profile Administration, as this will make it clear in these documents that provision of sampling data for PCs 5-8 is no longer required.
Scottish Power	Yes	We have no issues with proposed solution.
