# Credit Assessment Price Consultation – May 2021

---

Target Audience **BSC Parties**

Purpose of paper **For consultation**

Date published **17 May 2021**

Classification **Public**

Deadline for responses **25 May 2021 17:00**

## Summary

The Credit Assessment Price (CAP) is used in the Energy Indebtedness calculations to convert Credit Cover into an energy value. We are consulting on an increase of the CAP to **£77/MWh** from the last notified value of £70/MWh. A change to CAP can impact the amount of Credit Cover required by a BSC Party.

If all respondents and Credit Committee members are in agreement, the proposed value will be implemented on Wednesday 16 June 2021.

If at least one respondent or Credit Committee member requests it or disagrees with the proposed value, Elexon will arrange a Credit Committee meeting. The Credit Committee will determine if a change needs to be made to the value of the CAP, the trigger level and when any new value should be implemented.

BSC Parties are invited to respond to this consultation using the proforma available on the [Consultations page](#) of the Elexon website. Please return responses to [Credit.Committee@elexon.co.uk](mailto:Credit.Committee@elexon.co.uk) by 17:00 on Tuesday 25 May 2021.

---

## 1. Introduction

- 1.1 The Credit Assessment Price (CAP) is a parameter defined in [Section M1.4 of the BSC](#) as ‘the price it would be appropriate to use to determine the equivalent financial amount of BSC Parties’ Energy Indebtedness.’
- 1.2 A trigger event has occurred, meaning that the absolute difference between the CAP and the reference price is greater than the current trigger level of +/- £7/MWh. As a result, a consultation on a new CAP value has commenced. The consultation period will end at 17:00 on Tuesday 25 May 2021.
- 1.3 If required, the Credit Committee will meet shortly thereafter to determine if a new CAP value should apply.
- 1.4 If the Credit Committee **does not meet**, the proposed CAP value will be implemented on **Wednesday 16 June 2021**.

## 2. The CAP Value and trigger level

- 2.1 Following a breach of the upper trigger level we last consulted a new CAP of £68/MWh on 4 May 2021. The trigger level is always set at 10% of the CAP value, rounded to the nearest whole pound. The consultation closed on Wednesday 12 May 2021. No responses from industry disagreed with the proposed value of £68/MWh. However, with consideration to the recent upward trends of forward market prices since consultation, the Credit Committee members have agreed to set the new CAP value at £70/MWh.

2.2 The following table shows the historical CAP values since April 2019:

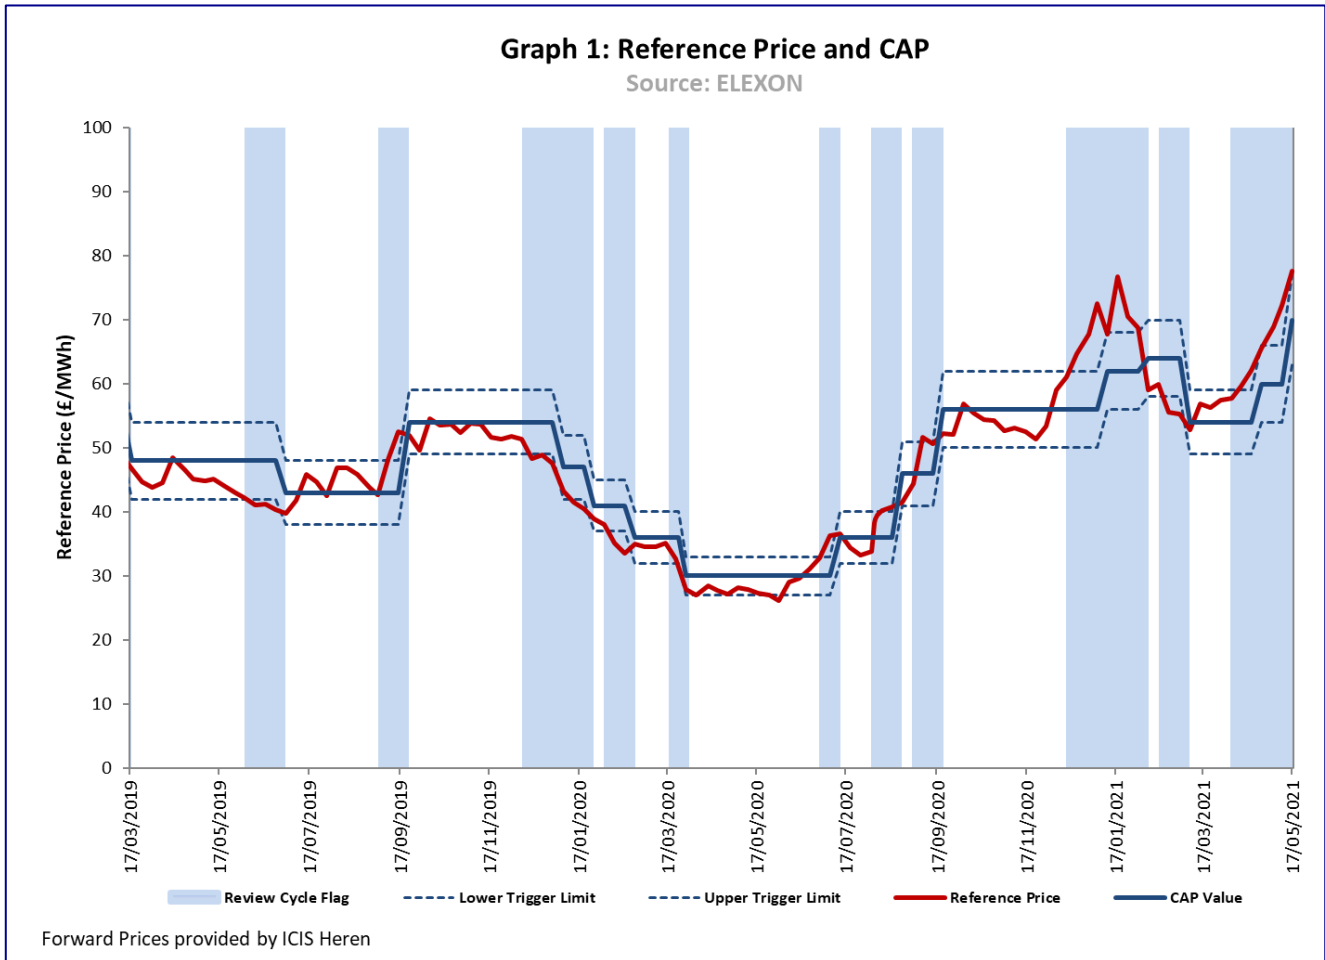

Effective From	Effective To	Value (£/MWh)	Trigger level (£/MWh)
03/04/2019	15/07/2019	48	6
16/07/2019	08/10/2019	43	5
09/10/2019	20/01/2020	54	5
21/01/2020	11/02/2020	47	5
12/02/2020	10/03/2020	41	4
11/03/2020	15/04/2020	36	4
16/04/2020	22/07/2020	30	3
23/07/2020	09/09/2020	36	4
10/09/2020	06/10/2020	46	5
07/10/2020	26/01/2021	56	6
27/01/2021	22/02/2021	62	6
23/02/2021	22/03/2021	64	6
23/03/2021	11/05/2021	54	5
12/05/2021	02/06/2021	60	6
03/06/2021	-	70	7

### 3. The CAP Review Process

- 3.1 On the first working day of each week, we compare the value of CAP to the Reference Price, which is derived from average monthly forward market prices currently provided by ICIS Heren. Where the absolute difference between the two values exceeds the trigger level, it is termed a 'trigger event'.
- 3.2 Once a new CAP value is notified to BSC Parties, the weekly trigger process is resumed on the first working day of the following week. The trigger process uses the newly notified CAP value for the comparison with the Reference Price. Following a trigger event, we issue a consultation proposing that the CAP is changed.
- 3.3 Following the consultation, if at least one respondent or Credit Committee member requests it, Elexon will arrange a Credit Committee meeting to determine the new CAP value. If all respondents and Credit Committee members agree with the proposed value no meeting will be held.
- 3.4 If a Credit Committee meeting is held, the Credit Committee will confirm the date from which change will take effect. This date will not be less than 15 Working Days after BSC Parties receive notification of the change.

#### 4. Recent Pricing Data

- 4.1 The current Reference Price (based on a five day average of June and July 2021 forward prices) is **£77.68/MWh**. This has triggered a CAP review with the Reference Price breaching the current upper trigger level of £77/MWh (last notified CAP of £70/MWh +/- £7/MWh).
- 4.2 **Graph 1** shows the Reference Price in comparison to the CAP value and the upper and lower limits of the trigger level. The area shaded in blue on this graph indicates previous periods where the value of CAP was under review.

- 4.3 **Graph 2** shows the daily average System Buy Price (SBP), the 30 day moving average of SBP and the value of CAP. This is a measure of how effective the current CAP review process is, as CAP is intended to be a proxy for outturn SBP.
- 4.4 Interactive versions of Graphs 1 and 2 in this consultation are available to BSC Parties on the 'Trading Operations Report' page of the [Elexon website](#).
- 4.5 We invite Parties to consider the proposal to **increase the value of CAP to £77/MWh**, from the recently notified CAP of £70/MWh, based on the current reference price and latest forward market prices.
- 4.6 The trigger level will increase to **+/- £8/MWh**.

- 4.7 Following the process described in the [CAP Review process Guidance Note](#), Elexon issue a consultation for a new CAP value based on the implementation date for the new CAP. As a new CAP would potentially be implemented in June 2021, the consulted on value is based on a 5-day rolling average of July and August 2021 forward market prices (those which would be used in the Reference Price calculation in June 2021). The current 5-day rolling average of July and August 2021 forward market prices is **£76.89/MWh**.

## 5. Next Steps

- 5.1 Following the end of the consultation period, if required, the Credit Committee will try to meet on the same week that the consultation closes, and decide whether to change the current CAP value and the trigger level. Any change will be notified to all BSC Parties, and the new value will come into effect at least 15 Working Days later.
- 5.2 If a Credit Committee meeting **is not required** at the end of the consultation period, the new CAP value of **£77/MWh** would be implemented on **Wednesday 16 June 2021**.
- 5.3 You are invited to respond to this consultation using the consultation proforma. Please return responses to [Credit.Committee@elexon.co.uk](mailto:Credit.Committee@elexon.co.uk) by **17:00 on Tuesday 25 May 2021**.
